Viktor

Multidisciplinary designer: graphics, AR effects and AI production

26 years old · Izhevsk, Russia · hybrid in Izhevsk or remote

Profile

Full-cycle designer: 12 years in graphics and 7 years in AR / XR. I take a project from idea to final file – identity, product cards and marketplace infographics, websites, AR effects (try-on, digital MUA, phygital, target tracking) and AI shoots of products and models.

I check how a layout prints, how a product card reads in real search results on a phone and how an effect behaves on a live camera. More than 20 brands and companies – from local shops to international ones.

Experience

2014 – 2026

Graphic design, LEDNIQUE

Identity and brand style, print and prepress, product cards and marketplace infographics, websites, presentations, social media. Project work with brands, including under NDA.

2019 – 2026

AR effects and XR

Face and body tracking, virtual try-on, digital make-up, target tracking, 3D masks and AR games. Built in Lens Studio, Effect House and Spark AR. Work for Glamnetic, OSCAR&FRANK, SLA Paris, H&M Beauty, Atomic Heart, NewJeans.

2023 – 2026

AI photo and video production

AI photoshoots of products and AI models, AI video, UGC content, creative prototyping. Material control: fur and pile, glass and clear plastic, textiles, light and reflections.

ONGOING

3D modelling and motion

Models and textures in Blender, low-poly adaptation, rigging, animation to music, product promo videos.

Skills

Identity · Logos · Print · Prepress · Product cards · Infographics · UI/UX · Websites · Presentations · Social media · 3D modelling · Motion · AR effects · Virtual Try-On · Digital MUA · AI photo · AI video
